Professional goals

Hello, I'm Hebertt, a passionate and skilled individual with a strong foundation in technology and coding. While I have gained extensive experience in technologies such as React.js, TypeScript, SCSS, and Redux Toolkit, context api, docker, node.js, mysql, mongodb and more. I am always eager to explore new opportunities as I believe it is a way to learn and grow.

In addition to my professional experience, I actively volunteer my time and expertise to teach coding classes, showcasing my commitment to giving back to the community and empowering others through education.

With hands-on experience running my own small company as a freelance developer, I have honed my communication, leadership, and project management skills. I am dedicated to staying updated with the latest industry trends and continuously improving my skills to provide the best possible solutions.

I am excited about opportunities that will allow me to further develop my skills, contribute to innovative projects, and learn from new experiences. I am confident in my ability to contribute to any team or project and deliver high-quality results. I am eager to pursue new opportunities that will challenge and broaden my expertise while continuing to make a positive impact in the field of technology through my commitment to giving back to the community.

Academic education

- Pursuing a Bachelor's Degree in Software Engineering
- Full Stack Web Development - Trybe, will be finalized in July 2023.

The program has over 1,500 class hours and covers introduction to software development, front-end, back-end, computer science, software engineering, agile methodologies and soft skills.

I also gave some volunteer classes: [link to the video](#)
